

Talk, Listen and Learn

One of the greatest skills children learn is how to talk and communicate. The development of speech and language provides a foundation for other skills, including how to listen, solve problems, read and write, as well as to speak and socialise with others.

Talk, Listen and Learn equips parents with clear and practical information on a range of topics:

- The essentials of speech, language and literacy development
- Fun ways to enhance development at home including the use of toys and music
- How to help your child through using computers and television
- Language development in multiple birth and multilingual children
- How to identify children with speech, language and literacy problems
- Suggested ways to tackle a range of speech and language problems at home.

Linda Clark and Catherine Ireland are qualified Speech Pathologists.
